# SPREADSHEET SERVER

Combine the Familiarity of Microsoft Excel with the Power of Your ERP

Spreadsheet Server works as an intuitive Microsoft® add-in providing live reporting and analysis from your ERP into Excel.

Benefits:

▸ Drill-down to sub-ledger detail in any ERP

▸ Retrieve fixed asset totals based upon account and asset criteria with drill-down to detail, for FA reporting

▸ Reporting platform conversion and migration

▸ Perform job costing reporting and analysis

▸ Eliminate requirement for IT or super-users to create/ change financial reports

▸ No staging area or data warehouse required

▸ Deploy in minutes

Complements your existing BI Strategy

No more downloading or re-keying/ exporting of ERP balance or transaction level data

Enhanced data analysis leveraging new features in Excel

ORACLE Gold Partner

Microsoft Partner
Gold Independent Software Vendor (ISV)

Connectability from Excel to multiple data sources across a variety of ERP platforms

Reduce data calculation times by incorporating big data with SMARTcache™ (IMDB)

QueryExchange™

Create any custom queries within your ERP or any other relational database

The cloud-based QueryExchange™ allows the ERP user community to share pre-configured queries

...And More

Dynamic Balances

Retrieve dynamic period, year-to-date, life-to-date and quarter balances using simple Excel formulas. Formula wizard is available to assist users in creating new formula expressions. Segment descriptions can also be retrieved or single accounts.

Lock it Down

Spreadsheet Server uses company level security as defined in your application.

Sharing is Caring

Spreadsheet Server users have full access to Global's cloud-based QueryExchange™, a query repository shared by users around the globe. With intuitive search capabilities, users can immediately see, download and use queries built by their fellow users directly in Microsoft® Excel.

Sign, Sealed, Delivered

Automate the distribution process of your reports by using Distribution Manager Utility within Spreadsheet Server. Print or email your reports, all with the click of a button.

Combination Station

Use wild cards, ranges, segment lists, or groups and sets to retrieve any combination of accounts into a single spreadsheet row. Segment Lists are user defined combinations of segments that are set at the local level or can be shared among multiple users.

Conversion

The conversion utility allows for quick conversion of the row definition detail within a report.

Drill, Drill, Drill

Dynamic drill down capabilities allow for review of detailed account balances and journal entry information. Combine your reporting with account analysis to achieve more efficient analysis of your key data.
