How Cherry Bekaert Made a Difference

A healthcare management company based in Atlanta, Georgia, approached Cherry Bekaert Credits & Accounting Methods Team (“C/AM”) about maximizing their R&D credit. The company is focused on medication management and develops protocols centered on care management to treat tens of thousands of patients every year.

Since beginning operations in 2000, the company has built and improved patient-focused medication management programs through testing of alternative solutions, and built software to improve patient experience. Improvements include: improved patient adherence programs, decreased pharmacy medication errors through use of robotic technology, a new patient portal, and new computerized, real-time integrations of the portal into other vendor EMRs. All technical upgrades improved performance, and functionality of patient programs

In 2018, C/AM offered the company a complimentary scope for the 2015-2018 tax years. Once on-site with the client, the team discovered even more qualified costs, expanding the benefits 13.2% beyond that of the scope to a staggering \$612,342 (350% ROI). At the conclusion of the study, C/AM continued communication with the client to ensure comprehension of the study, our deliverable, and a detailed explanation the benefits.

If your company engaged in qualified research activities for the last several years, you may be eligible to claim R&D tax credits. Cherry Bekaert can help you gain cash refunds from previously unclaimed credit.
