

THInc.IT Cyber Security Defense Platform

All organizations, regardless of size, need a well-built information and cyber security program to protect their information, money, personnel, customers and relationships. But for many small-to-mid-sized businesses (“SMBs”), hiring dedicated security talent isn’t feasible. Even larger organizations can find that growing security demands are too much for an already stretched staff to manage.

Get Started for \$200/Month & \$1.50/User/Month

Our Cyber Security program provides an affordable, practical solution for organizations that need to improve their security posture while minimizing costs and internal staffing resources. Our easy-to-use web portal consists of all you need to develop, document and manage a comprehensive information security program, as well as grants you access to an assigned Security Advisor.

Did you know?

\$4M is the average total cost of a data breach

60% of businesses close within six months of a data breach

33% of data breaches occur at companies with less than 250 employees

90% of all cyberattacks are delivered via phishing

Features

- ▶ **Assigned Security Advisor** – Access via portal to schedule telephone consultations with assigned security advisor
- ▶ **Phishing Simulations & Edutainment Training** – Create the human firewall with sophisticated simulations that both educate and entertain
- ▶ **Leaked Credential Monitoring** – Receive alerts if user credentials that are part of your domain are exposed
- ▶ **PreBreach Monitoring** – Visibility into security indicators, allowing you to audit your security stance and proactively address any issues
- ▶ **Security Health Check** – Easy-to-use survey that provides a visual assessment of gaps in your security program
- ▶ **Policies** – Access to, and establishment of, critical cybersecurity policies and controls for your organization
- ▶ **Security Intelligence News & Reports** – Curated and searchable newsfeed focused on risk reduction
- ▶ **Incident Response** – Incident response planning templates and quick access to security advisor for a 30-minute consultation in the event of a suspected breach
- ▶ **Cyber Awareness Training Resources** – Training resources include links to security awareness websites, material and presentations
- ▶ **FAQs** – Frequently Asked Questions can be used to gain a better understanding of the security issues that your organization faces

Jump start your security program with an easy-to-use, cloud-delivered program accessible from anywhere.
