

RISK & ACCOUNTING ADVISORY

Compliance, Risk Mitigation, & Managed Services

Identify, Protect, Detect, Respond, & Recover

No matter your organizational size or industry sector, cybersecurity risk is now relevant and should be at the forefront of any business. Because of this, protecting the data of your organization, as well as your customers and vendors, is paramount to being viewed as a trusted entity and employer. Meeting the ever-changing needs of reducing these risks and demonstrating related compliance requires the right mix of technology, subject matter knowledge and industry expertise.

We help our clients throughout the entire lifecycle of establishing appropriate cybersecurity programs based on your specific business. We do this in three ways:

Identify & Evaluate

Help create a custom cybersecurity maturity roadmap and the tools and compliance areas needed to meet related contractual requirements.

Mitigate & Protect

Development of plans to help you reduce identified risks and ensure protection for the ever-changing cybersecurity landscape.

Mature & Optimize

Implementation of digitally-enabled tools and techniques to achieve sustainable, optimal protection and compliance within your environment, as well as the ability to respond and manage incidents.

How Cherry Bekaert Can Help

Our Information Assurance & Cybersecurity practice helps clients address cybersecurity risks and related third party contractual requirements using customized risk management solutions, industry insights, and innovative automated tools tailored to meet your organization's objectives. We provide risk management services to support the full life-cycle of your IT compliance and risk management needs including:

1. Cybersecurity & Privacy Attestations/Certifications

Assist organizations in demonstrating compliance on their cybersecurity or privacy risk management program based on one or more criteria to meet a contractual, customer, legal or regulatory requirement. Examples include readiness and attest/cortication services for SOC (1, 2, 2+, 3, Cybersecurity and Supply Chain), PCI, ISO 27001/2, NIST 800-53 (FISMA, FedRAMP), NIST 800-171 (DFARS, CMMC), and HIPAA/HITECH/HITRUST, GDPR, CCPA.

2. Cybersecurity Risk & Technical Assessments

Designed to identify, evaluate and mitigate cybersecurity risks based on the dynamic threat landscape facing all organizations. Examples include: cyber governance, security awareness training, social engineering, vulnerability assessments, attack and penetration studies.

3. Managed Cybersecurity

Designed to provide a cost effective, scalable, managed cybersecurity program led by digitally-enabled solutions, coupled with on-demand subject matter experience and industry-backed knowledge. Examples include: fully out-sourced or co-sourced Managed Service Provider (MSP) and Managed Security Service Provider (MSSP) services.
