

Analytics and Insights Offering

Integrating data and analytics into your business practices enables strategic initiatives and helps your organization make better decisions while significantly enhancing your relationships with your customers and business partners.

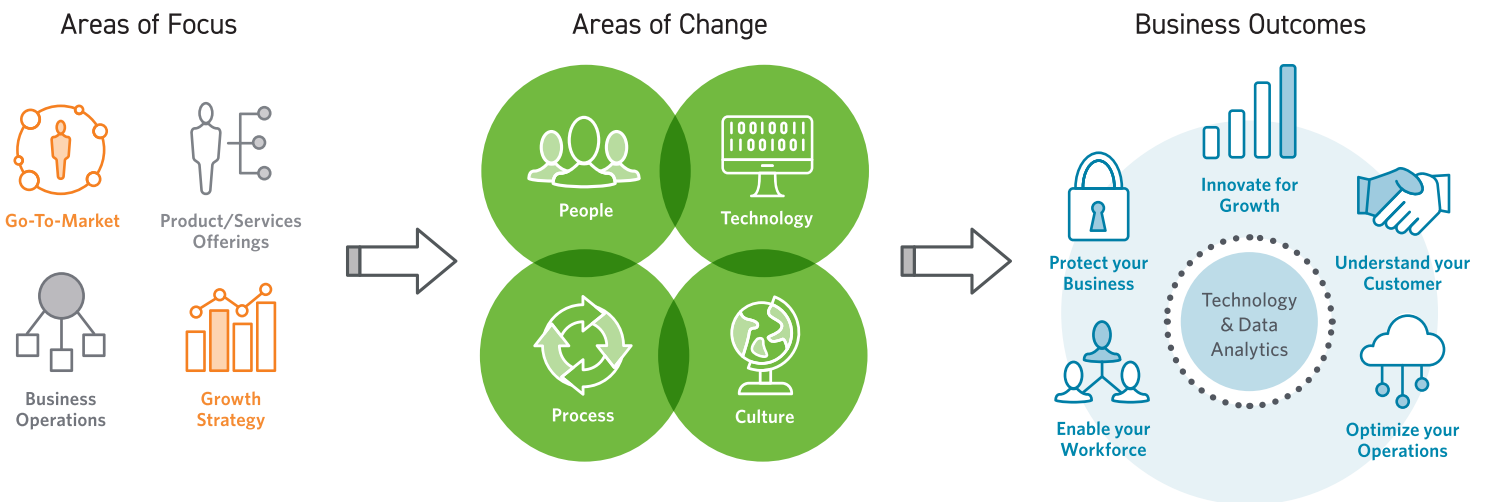

The current market conditions provide middle-market organizations a “once-in-a-lifetime” opportunity to take strategic risks, grow revenues and gain market share. Through data enablement, organizations can transform their performance, enhance workflows, drive automation and deliver rich real-time analysis that fuels smarter decisions and detailed insight into every aspect of the business.

Cherry Bekaert Digital Advisory provides strategic and tactical support to businesses, positioning them for long-term growth. In addition, we improve performance by transforming business models – leveraging technology and data as a core competitive advantage.

Digital Transformation Journey

A critical step in the digital transformation journey is establishing and executing a data and analytics strategy. With data being a critical business asset, an organization’s ability to compete will depend on how well data can be leveraged, analytics applied across the organization and new technologies adopted.

The Analytics and Insights Offering provides ideation and extends from strategy to implementation through optimization and rationalization and is structured to meet you where you are in your data journey. Our team of strategists, technologists and analysts have broad industry experience and keen business acumen. Our industry experience extends across professional services, industrial and manufacturing, technology, private

equity, real estate and construction, hospitality and retail, healthcare and life sciences, not-for-profit and government. The offering includes:

- ▶ Data Integration & Modeling
- ▶ Process Automation & Workflow
- ▶ Data Visualization

Analytics and Insights

Areas of Focus

The Analytics and Insights offering focuses on the following key components of the business:

- ▶ Data Identification - What does your organization want to achieve? What are key challenges in your organization? What are critical questions you need answers to? What data is needed to help your organization achieve its goals?
- ▶ Data Inventory - What data collection methods are you using? What data is accessible internally? What external data sources are needed?
- ▶ Insights and Workflow - How will your organization leverage the data? Is there an opportunity to automate data workflow?
- ▶ Visualize and Monetize Data - What visualizations are needed to extract insights and drive business decisions and revenue?
- ▶ Technology Infrastructure - What software and hardware do you currently have in place and how do they interact? What future systems can effectively and efficiently support your data goals?
- ▶ Organizational Readiness - What data competencies do you currently have? What skill sets are needed to meet your data goals? Do you need external data skills to meet your goals?
- ▶ Data Governance - What processes do you have established around your data. What policies, standards and metrics do you have established for your data? Who can access what data and take action?

Deliverables

The Analytics and Insights Offering provides leadership with:

- ▶ A strategic plan, aligned with your executive management and relevant departments, defining how data is sourced, leveraged, and applied throughout the organization.
- ▶ A data process model that represents the interrelated processes of systems taking into consideration dependencies, structure hierarchy and data flow.
- ▶ A data integration blueprint that aligns with business requirements and defines how data will be leveraged and integrated.
- ▶ A process automation and workflow roadmap that highlights pre-defined business rules for the routing of tasks, data and files providing end-to-end automation of analytics, machine learning, robotics process automation and data processes.
- ▶ Real-time interactive dashboards highlighting critical business insights.

Outcomes

Establishing and executing an analytics and insights strategy organizations can benefit from the following:

- ▶ Enable all stakeholders to a single source of truth allowing them to make better business decisions faster.
- ▶ Improve communication and collaboration amongst, stakeholders, customers, and suppliers.
- ▶ Improve the ability to identify, manage, and control resources and costs.

- ▶ Increase productivity of both people and processes.
- ▶ Automate repetitive processes.
- ▶ Provide deeper insights to drive value and innovation.
- ▶ Reduce and mitigate risks.
- ▶ Create a competitive edge against rivals in the market and drive innovation and new value.
- ▶ Maximize profitability, increase margins and speed to market.
