

The right digital platforms deliver unparalleled value that drives business performance, mitigates risks, and accelerates digital transformation.

Through a deep understanding of your organization, business processes, and supply chains, we leverage business intelligence and collaboration platforms to digitize every aspect of your business. Our award-winning digital platform providers can optimize your business processes in the areas of collaboration, custom cloud applications, enterprise content management and intranet, and financial management.

DIGITAL PLATFORMS & ANALYTICS

Digitally Transforming Leading Manufacturers

For 75 years, Cherry Bekaert has been a trusted partner to many prominent manufacturers.

Our holistic approach is uniquely tailored to the specific needs of the industry. We guide you through every step of the business life cycle: from proving strategic and tactical support positioning for long-term growth and performance by transforming your business model to leveraging technology and data as your competitive advantage.

- ▶ On-Premises to Cloud Migrations
- ▶ Custom Development
- ▶ End-User Training
- ▶ Business Solutions
- ▶ Data Integration

Collaboration Services

- ▶ SharePoint
- ▶ Teams
- ▶ Power Platform
- ▶ Dynamics
- ▶ ERP & Other System Integrations

Power Platform Solutions

The Microsoft Power Platform allows organizations to utilize cutting edge cloud technologies to achieve complex business process solutions.

Power Apps

Power Apps offers organizations a suite of apps, services, connectors, and a data platform to build custom applications that can integrate with a wide range of software solutions including Office365, SharePoint, Teams, Dynamics, Azure, SQL, and many others.

Power Apps help transform manual processes into efficient digital solutions.

Essentially, built-in Power Apps optimize web browsers and mobile environments, therefore, customers can access and interact in real-time, from anywhere, with the touch of your mobile devices.

Power Automate

Power Automate gives organizations the ability to automate business processes, move business data between systems, connect to more than 500 data sources built-in or through publicly available APIs, as well as using advanced process automation technology through Robotic Process Automation (RPA). Power Automate is not a basic workflow engine, it is an automated platform that enables you to intensify workforce productivity and create new efficiencies.

Power BI

Power BI allows users to create a collection of services, apps, and connectors that turn these unrelated sources into interactive, visual dashboards and analytics to drive decision making.

On-Premises Migration to the Cloud

Cherry Bekaert can conduct Digital Transformation Assessment of your current digital environment and determine the level of effort to move your applications to the cloud either through a migration or a re-build in the Power Platform or Azure Services.

The Digital Difference

Cherry Bekaert's Digital Advisory practice helps companies ignite growth by quickly assessing, transforming, and sustaining business strategies based upon priorities, strategic plans, and budget. Utilizing an agile and flexible approach, we help you to reengineer your business operations and services offered, examining each area with a focus on people, process, technology, and culture.
