

Technology

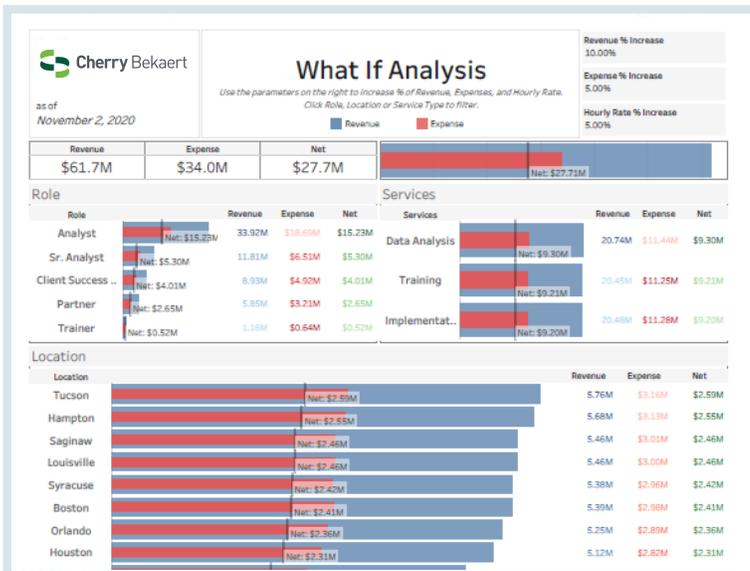

The waves of digital change continue to shape the technology industry and provide companies with opportunities to be forward-looking and future ready. With the industry focused on innovation, creation and growth, technology organizations are transforming the way we learn, communicate, knowledge share and consume goods. Cherry Bekaert helps technology firms stay on the leading edge of the industry and guide you through all phases of development, expansion, and growth.

Consulting dashboard provides insights into billings, growth year over year, including revenue by service types, employee role and locations. Metrics include billings by top and bottom performing clients by revenue and top and bottom performing employees by billed hours.

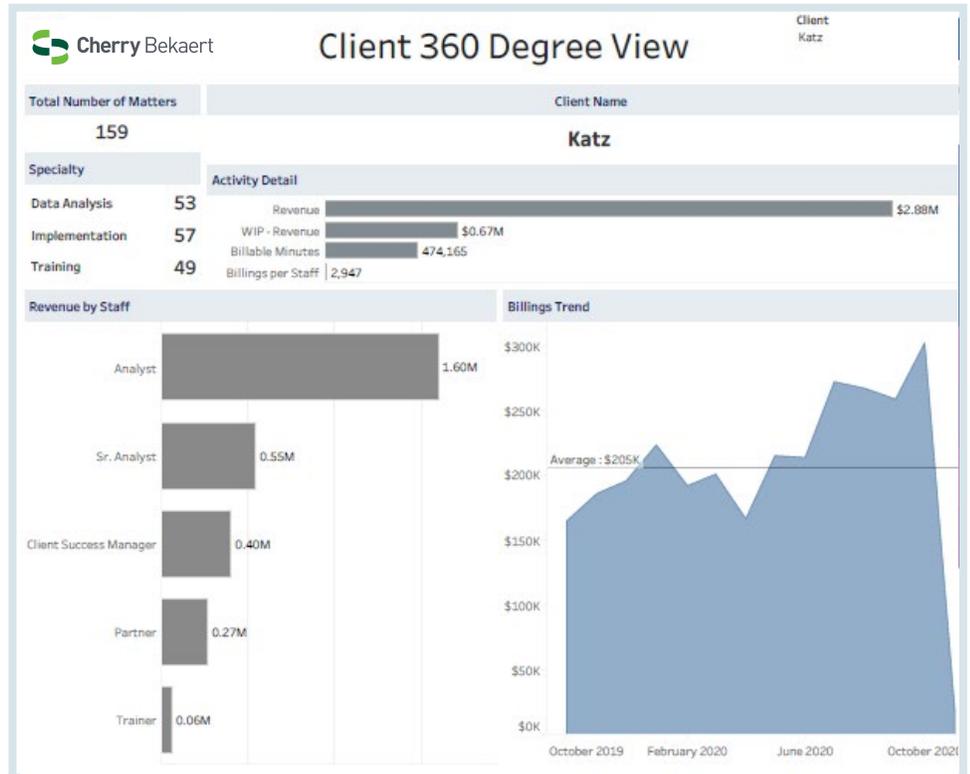

Business Outcomes and Industry Insights

The industry is in constant forward motion. Major dominating organizations like Google, Amazon, Apple, Meta Platforms, and Microsoft continue to introduce innovative business models and new ways to deliver goods and services to consumers with smaller organizations attempting to compete. With a never-ending undercurrent of change in the industry, technology organizations must be fully invested in staying ahead of the trends and understanding the enabling technologies that exist and/or are emerging and how they can advance business models.

What-If Analysis dashboard enables users to change the values in cells to see how those changes will affect the outcome of formulas on the worksheet. Insights include revenue by role, services, and location.

Enabling technologies such as artificial intelligence (AI) and machine learning (ML) are improving enterprise performance and productivity by automating tasks and processes and analyzing data faster than human capability. Cloud technologies are enabling reduction in overhead costs, increasing efficiencies and are providing greater collaborative management, security, and flexibility. The integration of the internet of things (IoT), AI and analytics into computer programs known as digital twins, uses real world data to create simulations to predict how products and processes will perform. Blockchains are playing a crucial role in cryptocurrency systems maintaining a secure and decentralized record of transactions without the need for a trusted third party. The metaverse, an integrated network of 3D virtual worlds, is welcoming in a new era of digital connectivity, virtual reality experiences and e-commerce.

Client 360 Degree View provides an overview of total projects in the pipeline detailed by specialty. Insights include total revenue, work in progress revenue and billable potential. Metrics also show billings by staff and a timetable trend.

Technical Deliverables

- ▶ Digital Strategy and Transformation
- ▶ Process Optimization and Workflow Automation
- ▶ Business Intelligence and Data Analytics
- ▶ Embedded Applications
- ▶ Digital Platforms
- ▶ Managed IT Security and Systems
